

Aluminium foil

a 03

Suitable for many laboratory applications, including sealing bottles, culture tubes, stopping leaks, reducing evaporation or heat losses, covering corks, making weighing boats or dishes.

Ideal for use in autoclaves.

Aluminium foil, Super-Polyfoil™

a 03

For suspension cultures, media preparation or storage.

May be used to cover vessels for autoclaving and incubating.

Resists tearing and puncture, provides sterility protection, autoclavable and provides a chemically inert barrier. Polyester complies with FDA regulations governing direct food contact applications. A blue thermoplastic polyester layer is laminated to 1µm aluminium foil. The laminate is easier to remove following autoclaving than plain aluminium foil which is subject to oxidation.

Flasks, shaker, polycarbonate

Fisherbrand®

S a NEW

46

For suspension cultures, media preparation or storage

- Moulded in graduations
- Polycarbonate with polypropylene closure; vented closure has 0.22µm pore PTFE
- Sterile, non-pyrogenic and non-cytotoxic
- Certified sterile at 10⁶ SAL USP Class VI (5 year shelf life)
- For single use; individually packed for easy storage and handling
- Available with plain bottom for use on bench top, or baffled bottom for shaker table use
- Available with vented or non-vented screw closures

Flask and non-vented closures are autoclavable.
