### Gloves, PVC, chemical resistant, Sempersoft, PPE Category III

S4

High quality, reusable, green PVC gloves on a smooth and soft cotton lining. Anatomically handed in pairs these gloves are 1.1mm thick at the palm and have a length of 310mm with a straight cuff and have an AQL of 1.5. On the outside is a structured rough surface in a grip pattern for excellent handling especially in wet conditions. Free of latex proteins and accelerators this PVC glove offers excellent general chemical resistance. Length 300mm.

Chemical resistance data for this glove is available at [www.sempermed.com](http://www.sempermed.com). Select the industrial gloves section from European Branch and then click on 'English', then 'Products', and then from the list headed 'Chemical Protective Gloves' select 'Sempersoft' and then click on 'Show List' for chemicals. Alternatively you can access the 'Products' section of the Sempermed® site for this information via the Fisher Scientific website.

### Gloves, nitrile, chemical resistant, Premium Sol-Vex™, PPE Category III

S4

A premium nitrile glove providing new standards of safety for high risk chemical handling. Each glove is individually air-pressure tested. Manufactured from a newly developed nitrile film which offers greater strength and superior chemical resistance, suitable for particularly hazardous chemical areas, e.g. chemical manufacture, transfer of aggressive chemicals and handling chemical mixtures. Other areas for use include oil refining, laboratory testing and the handling of pesticides, insecticides and plant protection chemicals. Sanitised®/Actifresh® with dot pattern reverse lozenge grip that actually strengthens the glove. Flock lined with semi-gauntlet length for better forearm protection. Lozenge style. Colour red. Length 380mm, thickness 0.425mm.
